Wine is sexy! Especially in America, wine has always been associated with special occasions. If we want to impress someone with a nice dinner, or establish a romantic ambience for that special "someone," we typically include a bottle of nice wine to emphasize the importance of the occasion.

At Pamo Valley Winery, we are very passionate about making premium wines that are pleasing to the palate. We believe that wine is feminine by its very nature. Wine is a gift from Mother Nature. When crafted by capable human hands, and well made, it is a joy.

Our winemaking philosophy at Pamo Valley Winery is to keep the wines approachable and enjoyable by a broad spectrum of the wine drinking public. We consciously make our wines "female friendly". Recent polls by Gallop and Adams Media show that women make 55% of the wine purchases in America. We carefully craft our wines to be fruit forward and soft on the finish – no big, tannic bombs out of our winery!

We hope that you feel the sexiness in our wines when you drink them. Pour some of our passion tonight – pour Pamo Valley Wines!
